

**Township of Dorion**  
**Class Environmental Assessment**  
**Replacement of Ouimet Canyon Road Bridge over Coldwater Creek**  
**Notice of Commencement**

---

The Township of Dorion is proposing to replace the Ouimet Canyon Road Bridge over Coldwater Creek. The bridge is located approximately 2.7 kilometres north of Highway 11/17. The existing double lane, triple span structure consists of steel girders with a timber deck supported on timber bent piers and timber pile and lagging abutments. The existing, aged structure is in poor condition and is currently load rated at 5 Tonnes gross vehicle weight due to advanced rotation of the south pier. Options to address the problem include replacement of the existing bridge with a new steel, multi-plate arch culvert.

The Township of Dorion along with JML Engineering will be hosting an information session outlining the proposed replacement of the bridge as follows:

Monday, March 26, 2018  
3:30 pm to 6:30 pm  
Dorion Community Centre  
175 Dorion Loop Road  
Dorion, ON P0T 1K0

The project is being planned under **Schedule B** of the **Municipal Class Environmental Assessment**.

Input and comment are invited for incorporation into the planning and design of this project. Subject to comments received, and the receipt of necessary approvals, the Township of Dorion intends to proceed with the planning, design, and construction of this project, to be completed by late 2018.

This Notice is issued March 14, 2018.
